

SERINI PUWAKGOLLA

Computer Science Undergraduate | Software Engineer Intern | Full-Stack & Mobile Developer | Aspiring AI & ML Engineer

Resident @ No. 40, George E. de Silva Road, Kandy | 0711418744 | serinipuwakgolla@gmail.com

[LinkedIn Profile](#) | [GitHub Portfolio](#)

PROFILE

A Computer Science undergraduate specializing in full-stack and mobile application development, with hands-on experience building AI-powered systems using FastAPI, React Native, and modern APIs. Developed real-world projects including a voice-to-text sentiment analysis platform integrating NLP and audio processing. Experienced in building scalable applications, designing responsive user interfaces, and implementing backend systems with clean, maintainable code. Passionate about solving real-world problems through technology and continuous learning.

EDUCATION

University of Sri Jayewardenepura | 2022 – Present (Expected Graduation: 2027)
Bachelor of Science (Hons) in Computer Science

PROFESSIONAL DEVELOPMENT

Cyber Security & Ethical Hacking – Sri Bharathee Nenasala, Peradeniya

Microsoft Power BI – Alison

Java Programming (6 Months) – SLIIT

TECHNICAL SKILLS

Frontend & Mobile Development: React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Blade, Expo, Android Studio

Backend Development: PHP (Laravel), Python, FastAPI, RESTful APIs, Node.js

Databases & Cloud: MySQL, MongoDB, SQLite, Appwrite (BaaS)

DevOps & Version Control: Git, GitHub (Branching, Version Control)

Data Analytics: Power BI, Microsoft Excel, Data Modeling

PROJECTS & PUBLIC REPOSITORIES

1. Tasks Manager Application | Backend & Systems

Tech Stack: PHP, Laravel, Blade, CSS, MySQL

Description: Developed a robust task management web application leveraging the MVC architecture. Implemented secure user authentication, dynamic CRUD operations for task tracking, and a responsive frontend interface using Blade templating.

GitHub: [SherinDZerogithub/tasks-manager](https://github.com/SherinDZerogithub/tasks-manager)

2. E-Commerce Platform | Full Stack Web Development

Tech Stack: JavaScript (ES6+), Node.js, Express, MongoDB, Vite, HTML5, CSS3

Description: Built a complete full-stack e-commerce application featuring a decoupled frontend built with Vite and a robust backend server. Implemented a non-relational database structure using MongoDB to manage product catalogs, user data, and order history, alongside handling asynchronous API routes and core business logic.

GitHub: [SherinDZerogithub/e-commerce](#)

3. Cross-Platform Movie Discovery App | *Mobile Development*

Tech Stack: TypeScript, React Native, Expo, Expo Router, NativeWind (Tailwind CSS), Web APIs

Description: Built a cross-platform mobile application utilizing React Native and Expo. Implemented file-based routing with Expo Router for seamless screen transitions, crafted a highly responsive user interface using NativeWind (Tailwind CSS), and handled dynamic data fetching from movie database APIs to deliver personalized content recommendations.

GitHub: [SherinDZerogithub/Movie-Recommendation](#)

4. Mood Voice | *Software Engineering*

Tech Stack: Python, FastAPI, React Native, SQLite, Gemini API, YouTube API, JWT, local NLP transformers (BLIP/CLIP)

Description: Built a highly interactive cross-platform mobile application utilizing React Native on the frontend and a FastAPI backend server. Designed key features including secure JWT authentication, real-time voice-to-text mood journaling, semantic sentiment analysis, and image-based mood recognition utilizing the Gemini API. Implemented advanced backend analysis of raw WAV audio prosody (analyzing pace, pauses, and volume) and integrated the YouTube API to dynamically serve personalized music playlists according to computed vibe scores.

GitHub: [SherinDZerogithub/Voice-To-Text](#)

5. Game Development Sandbox | *Systems & Game Logic*

Tech Stack: FastAPI, Pydantic v2, Groq/Gemini APIs, Pollinations/Gemini image API, SQLite

Description: **AI Storyteller**, an interactive game engine where players type actions and receive AI-generated narration with cinematic scene images. Tracks inventory, vitals, and plot threads, while offering smooth transitions, choice cards, and achievements. Backend handles narration and image generation

PROFESSIONAL EXPERIENCE

Software Developer (Part-Time / Intern)

Apps Technologies — Colombo, Sri Lanka - Nov 2025 – Present

- Contributed to the development of a web-based financial ERP platform.
- Developed and maintained web application features using PHP/Laravel and JavaScript.
- Improved backend validation logic, increasing data integrity and reducing runtime errors
- Collaborated with cross-functional teams to optimize application performance
- Gained hands-on experience working with real-world scalable systems
